

Reject NAB's petition 04-160. The service XM Satellite Radio provides is invaluable to its paying subscribers. I live in a small market with completely inadequate and limited choices in radio (and TV). XM Satellite Radio is a godsend and any efforts to restrict its content should be rejected. It is bad enough that you will not allow Direct TV to sell me the national feeds for ABC, NBC, CBS etc. so that I can be spared the garbage programming my local channels insist on feeding me, now you want to squash Satellite radio. It is outrageous that the interests of the broadcasters seeming always trump the interests of consumers. Reject the Petition.
